ATTACHMENTS:

- A. **Agency Loss Control Plan** Attachment (*CD-160802.A*) (4 Pages)

DEFINITIONS:

- A. Agency or State Agency: Any agency, department, board, instrumentality, or institution of New Mexico State Government.
- B. Committee: Any agency-level Loss Control/Safety Committee, or division or other-level Loss Control/Safety Committee, or all of these as the context require.
- C. Loss Control: A system for identifying, dealing with, reducing, or eliminating exposure to risks which may result in bodily injury, property damage, or other types of injury, death, property damage, or other types of liability covered under insurance or self-insurance programs. Examples include, but are not limited to, the following classes of risk:
1. A state employee who slips and falls on the job (Workers Compensation).
 2. A state employee who, while driving his or her own or a state vehicle while on state business, has an accident (auto liability and property damage).
 3. Fire or other catastrophe that damages or destroys a state building (property damage).
 4. A state doctor who leaves a sponge inside a patient following an operation (medical malpractice).
 5. A law-enforcement officer who arrests a person without proper legal authority to do so (law-enforcement liability).
 6. A patient who falls out of bed in a state hospital (hospital liability).
 7. A visitor who slips and falls in a state building (general liability, premises and operations).
 8. A state employee who fails to send a required notice (public official and employee, errors and omissions).
 9. A state agency that fails to promote a person because of his or her sex, race, national origin, or age (employment discrimination).
 10. A state board that fails to grant a hearing to a licensee prior to that board's considering a revocation of his or her license for cause (violation of constitutional rights).
 11. A public employee who mishandles public money in his or her control (fidelity and surety bond loss).
 12. A state vehicle that has been left overnight in an unlighted parking area and which is subsequently vandalized (crime comprehensive auto coverage).

- D. Loss Control/Safety Chairperson: Departmental employee at the Institutional Level who is responsible for Loss Control.
- E. Loss Control/Safety Coordinator: Employee who is responsible for coordinating Loss Control efforts at the Departmental level.
- F. Loss Control/Safety Manager: The State Loss Control/Safety Manager of the Risk Management Division of the General Services Department.
- G. Risk Management Division: The Risk Management Division of the General Services Department.
- H. Self-Inspection: That part of a Loss Control Plan that consists of efforts to identify and record potential hazards or situations that might tend to result in a loss.

POLICIES:

- A. The Corrections Department shall implement and maintain a Loss Control Program.
- B. The Secretary shall adopt and promulgate in writing, a plan providing, at a minimum, for the following:
 - Appointment and duties of Loss Control/Safety Coordinator;
 - Appointment and duties of Loss Control/ Safety Committee Members.
 - Procedures for self-inspection;
 - Procedures for loss investigation; and
 - Loss-Control education and training.
- C. A copy of the plan and initial appointments shall be submitted to the Loss Control/Safety Manager (Risk Management Division). Any changes in the program or appointments shall be submitted to Loss Control Manager.
- D. Appointments expire two years from their effective date or when the agency head makes new appointments, whichever comes first.
- E. Should the Secretary fail to adopt and promulgate an agency Loss Control Plan in accordance with this policy, or should any activity fail to appoint persons to any vacant positions included in such a plan, the Loss Control/Safety Manager shall bring this to the Secretary's attention in writing.
- F. Within the constraints of available time, the Loss Control/Safety Manager, upon request of the Secretary, shall assist the agency in drafting its Loss Control Plan. The Loss Control/Safety Manager shall develop and draft a model Loss Control Plan that shall be available to every activity for use in drafting its Loss Control Plan.

- G. The Department shall have a written plan for preventive maintenance of the physical plant; the plan shall include provisions for emergency repairs or replacement in life-threatening situations. [4-4218]
- H. A written plan shall address offender and staff injury prevention. The plan shall be based on an analysis of the facility's injury experience and includes methods for identification of problems and preventive or corrective measures. [4-4420]
- I. Each facility shall establish health and safety rules that are to be distributed to all staff, volunteers, contractors, and inmates assigned to industries. [2-CI-1A-1]
- J. All Industries staff, volunteers, contractors, and inmates shall receive an orientation to safety and operating instructions for equipment prior to using the equipment. [2-CI-1A-2]
- K. An ongoing formal safety training program shall be provided for staff, volunteers, contractors, and inmates in the Corrections Industries Program. Training will be provided in accordance with a regular schedule established by the industries operation. [2-CI-1A-3]
- L. Corrections Industries shall adhere to applicable federal, state, local fire, sanitation, safety, and health standards. [2-CI-1A-4]
- M. Corrections Industries Program shall conduct meetings quarterly and shall accept input from inmate workers. [2-CI-1A-5]

TITLE: Loss Control Program		

AUTHORITY:
Policy *CD-160800*

PROCEDURES:

A. Corrections Department Loss Control/Safety Committee: Creation, Duties:

1. The Secretary shall appoint a Loss Control/Safety Committee of at least five members and a coordinator for the Corrections Department. In addition, the Corrections Department's loss control plan may provide for committees at divisional or other appropriate levels.
2. The Committee shall elect a chairperson and a secretary from among the committee members annually.
3. The Committee shall hold regular quarterly meetings at the call of the chair or a majority of the committee members. Special meetings may be called as needed in the same manner. The Committee secretary shall keep brief minutes of the proceedings. The minutes shall be made available to the Loss Control/Safety Manager or a representative for review during the Corrections Department's annual Loss Control Program audit.
4. When reviewing individual cases or incidents, the Warden of the affected institution shall be present at the meeting in person or by phone. In cases involving Probation/Parole, the Regional Manager shall be present. When Corrections Industries is involved, the Shop Supervisor shall be present.
5. The Loss Control/Safety Committee's duties shall include, but are not limited to, the following:
 - a. Reviewing the Corrections Department's loss information to ensure adequate measures are being taken to prevent recurrence of the same or similar losses. Where such measures are not adequate, the Committee shall make recommendations or initiate additional action, as appropriate;
 - b. Establishing, evaluating, and making recommendations for improvements in the Corrections Department's loss control activities; and
 - c. Performing any other functions the Committee deems useful and appropriate, and which are consistent with the Corrections Department's Loss Control Plans.

B. Self-Inspections:

1. The Corrections Department shall institute and carry out self-inspections as part of the Loss Control Plan. Self-inspection of each institutional operation should be made as often as needed, but at least semiannually the first year of the Corrections Department's loss control plan's operation, and at least annually thereafter.
2. The Loss Control Coordinator shall prepare checklists to be used for self-inspection. Checklists should be tailored to the specific work environment being inspected, should be specific as to the risks being inspected for, and should otherwise be easy to use. Checklists should not be limited to physical hazards, but should also address non-physical actions which might result in loss; for example, procedures and activities which might result in discrimination claims or claims that an employee or agency was denied notice or opportunity to be heard before unfavorable action was taken.
3. A written report shall be made of all conditions noticed during self-inspections. A copy of any divisional or other-level report shall be furnished to the Corrections Department's Loss Control Coordinator. For each noted unsatisfactory condition, a response shall be made describing the corrective action taken. The supervisory person responsible for the operation in which the unsatisfactory condition is found shall respond in writing within 30 days from the time the condition is brought to his or her attention.

C. Loss Investigation:

1. The Corrections Department shall establish and carry out procedures for investigating and evaluating losses as part of the agency Loss Control Plan. The procedures shall provide that losses be thoroughly investigated by the supervisory person most immediately responsible for the operation in which the loss occurred. The investigation shall be reduced to a written report describing:
 - a) The loss;
 - b) The investigator's opinion as to the cause of the loss; and
 - c) The investigator's recommendation for avoiding future losses of a similar nature.
2. A copy of the investigation report shall be furnished to the investigator's immediate supervisor and to the Corrections Department Loss Control Coordinator.
3. If the number and complexity of losses makes loss investigation too great a burden on supervisors, the duty to investigate may be delegated with the Secretary's approval.
4. Within 30 days of receipt of a loss investigation report, the agency Loss Control Coordinator shall evaluate the adequacy of the action taken to avoid recurrence. Such evaluation shall be provided to the Loss Control Committee and the supervisor responsible for the report.

5. Any investigation and reports prepared pursuant to this policy are supplementary to and do not replace reports required to comply with state and federal laws. Wherever possible, however, efforts to meet the requirements of this policy and other applicable laws should be combined.

D. Loss Control Training:

1. In order that all employees better understand why losses occur and how they can be avoided, the Corrections Training Academy shall provide loss control training to its employees on a regular basis. Integration of this training with other training programs is encouraged.
2. To be effective, the training must reach the worker and must be understood.
3. Training in the proper way to perform each job is basic to loss control and shall be fully covered in initial training.
4. A review of losses within the Department, and an explanation of why losses occurred, shall be used to supplement formal training. The review shall be circulated to employees annually.
5. The New Mexico Occupational Health and Safety Act contains requirements which afford protection to employees against injury or illness on the job. The provisions of the Act shall be included as a continuing part of loss control training.

AUTHORITY:

Policy *CD-160800*

PROCEDURES:

A. Institution and Division Loss Control Committees: Creation and Duties:

1. All Wardens and Division Directors of the Probation/Parole, Corrections Industries and the Corrections Training Academy shall appoint a Loss Control Committee of at least five appointive members and a coordinator to chair each committee. These appointments shall be announced using the **Agency Loss Control Plan** Attachment (CD-160802.A) (4 Pages).
2. Each committee shall elect a secretary from among the committee members annually.
3. The committee shall hold regular monthly meetings at the call of the chair or a majority of the committee members. The committee secretary shall keep brief minutes of the proceedings. The minutes shall be made available to the Loss Control Manager or a representative for review during the Corrections Department's annual Loss Control Program audit.
4. The Loss Control Committee's duties shall include, but are not limited to, the following:
 - a. Reviewing their respective activities loss information to ensure adequate measures are being taken to prevent recurrence of the same or similar losses. Where such measures are not adequate, the committee shall make recommendations or initiate additional action, as appropriate;
 - b. Establishing, evaluating and making recommendations for improvements in the Corrections Department's loss control activities; and
 - c. Performing any other functions the committee deems useful and appropriate, and which are consistent with the Corrections Department's Loss Control Plans comply with state and federal laws. Wherever possible, however, efforts to meet the requirements of this policy and other applicable laws should be combined.

B. Self-Inspections:

1. Each committee shall institute and carry out self-inspections as part of the Loss Control Plan. Self-inspection of each operation shall be made as often as needed, at least semiannually the first year of the Corrections Department's Loss Control Plan's operation, and at least annually thereafter.
2. The Loss Control Chairman shall prepare the following check-lists to be used for self-inspection:
 - **Checklist for Offices Self-Inspection** form (*CD-160802.1*) ;
 - **Checklist for Institutions Self-Inspection** form (*CD-160802.2*);
 - **Checklist for Institutions (Tools) Self-Inspection** form (*CD-160802.3*);
 - **Checklist for Institutions (Mowers) Self-Inspection** form (*CD-160802.4*).

Checklists shall be tailored to the specific work environment being inspected, and shall be specific as to the risks being inspected for.

3. A written report shall be made of all conditions noticed during self-inspections. A copy of any divisional or other-level report shall be furnished the Corrections Department's Loss Control Coordinator. For each noted unsatisfactory condition, a response shall be made describing the corrective action taken. The supervisory person responsible for the operation in which the unsatisfactory condition is found shall respond in writing within 30 days of the time the condition is brought to his or her attention.

C. Loss Investigation:

1. Each committee shall establish and carry out procedures for investigating and evaluating losses as part of its Loss Control Plan. The procedures shall provide that losses be thoroughly investigated by the supervisory person most immediately responsible for the operation in which the loss occurred, the **Supervisor's Incident Investigation Report of Loss** form (*CD-160802.5*) shall be used to report this. The investigation shall be reduced to a written report describing:
 - a. The loss;
 - b. The investigator's opinion as to the cause of the loss; and
 - c. The investigator's recommendation for avoiding future losses of a similar nature.
2. A copy of the investigation report shall be furnished to the investigator's immediate supervisor and to each Corrections Department Loss Control Chairman.
3. If the number and complexity of losses makes loss investigation too great a burden on supervisors, the duty to investigate may be delegated with the Secretary's approval.
4. Within 30 days of receipt of a loss investigation report, the agency Loss Control Coordinator shall evaluate the adequacy of the action taken to avoid recurrence. Such evaluation shall be provided to the Loss Control Coordinator, the Loss Control Committee and the supervisor responsible for the report.

5. Any investigation and reports prepared pursuant to this policy are supplementary to and do not replace reports required to comply with state and federal laws. Wherever possible, however, efforts to meet the requirements of this policy and other applicable laws shall be combined.

D. Loss Control Training:

1. In order that all employees better understand why losses occur and how they can be avoided, the New Mexico Corrections Training Academy (NMCTA) shall provide loss control training to its employees on a regular basis. Integration of this training with other training programs is encouraged.
2. To be effective, the training must reach the worker and must be understood.
3. Training in the proper way to do the job is basic to loss control and shall be fully covered in initial training.
4. A review of losses within the Department, and an explanation of why losses occurred, shall be used to supplement formal training. The review shall be circulated to employees annually.
5. The New Mexico Occupational Health and Safety Act contains requirements that afford protection to employees against injury or illness on the job. The provisions of the Act shall be included as a continuing part of loss control training.

NEW MEXICO CORRECTIONS DEPARTMENT

Agency Loss Control Plan

DATE: _____

TO: All _____ Personnel

FROM: The Secretary

RE: State Agency Loss Control Plan

A State of New Mexico Loss Control Program has been implemented by General Services Department Rule 91-703, effective Nov. 14, 1991. The purpose of the program is to help control the cost of state government through the control of insurable losses. One of the factors used to determine what insurance premiums will be charged to state agencies for various insurance coverage is the number and amount of losses experienced in the past. Therefore, the reduction of losses will have a favorable effect on future premiums charged to an agency. Although the primary purpose of the program is to reduce the cost of state government, there are other worthwhile benefits that directly result from the reduction of losses. A reduction of worker's compensation claims means fewer of our fellow employees were injured on-the-job. Reduction in property losses means that less of our property, material and equipment was stolen, lost, damaged, or destroyed. Uncontrolled losses in either or both of these categories can seriously affect the efficiency with which we perform our function of government. All these factors make it important for agencies of the state government to make a joint effort to reduce their insurable losses and insurable loss exposures through implementation of an agency Loss Control Plan. Success will be rewarding to us all, as employees and citizens.

In compliance with and support of the State Loss Control Program, I am hereby implementing a state agency Loss Control Plan as of this date.

PROVISIONS:

1. Loss Control Committees:
 - a) I have appointed a Loss Control Committee consisting of the following personnel:*
 - _____ - Deputy Warden
 - _____ - Safety and Sanitation Officer
 - _____ - Personnel Manager
 - _____ - Food Services Director
 - _____ - Physical Plant Supervisor
 - _____ - Union Representative

*These are given as an example; actual make up of committees will vary by institution.

- b) The committee will meet quarterly or as otherwise scheduled by me.
- c) The chairman will insure that meeting minutes are prepared for items discussed by the committee during these meetings, and forwarded to me for my review, approval and signature. A copy of the minutes will then be forwarded to each committee member. Authorization for further distribution of the minutes by committee members will be indicated on the minutes.

NEW MEXICO CORRECTIONS DEPARTMENT
Agency Loss Control Plan
(Continued)

- d) Responsibilities and activities of the committee will be as outlined in the Corrections Department's Loss Control Program.
- (1) Review loss summary information provided by the Risk Management Division of the General Services Department to identify adverse trends and develop corrective actions.
 - (2) Review loss investigation reports for adequacy of corrective action to reduce possibility of similar losses in the future and make recommendations where appropriate.
 - (3) Review summary findings of the self-inspection program, evaluate action taken, and follow up to insure final corrective action is taken as planned or recommended.
 - (4) Evaluate adequacy and effectiveness of the agency Loss Control Plan and make recommendations for improvement as appropriate.

2. Loss Control Coordinator:

- a) I have appointed _____ as the Loss Control Coordinator.
- b) The Loss Control Coordinator is a member of the Loss Control Committee and will perform the responsibilities outlined in the Corrections Department's Loss Control Program. These responsibilities include:
 - (1) Act as liaison between the agency and other state agencies, the Risk Management Division of the General Services Department, and insurance carriers.
 - (2) Receive loss summaries from the Risk Management Division or insurance carriers and provide the information to the Loss Control Committee for review.
 - (3) Ensure that a "Supervisor's Report of Loss" has been completed on all losses as required by this plan.
 - (4) Present briefings at Loss Control Committee meetings to indicate losses experienced during the current policy year as compared to previous policy year(s) and other briefings as directed by me.

3. Reporting of Losses:

- a) Any employee suffering an on-the-job injury is encouraged to notify his/her direct supervisor immediately so that the circumstances can be investigated and, if necessary, reported to the worker's compensation insurance carrier.
- b) Any employee who becomes knowledgeable of missing/damaged/destroyed property/materials/equipment that is owned/borrowed/rented or other- wise the responsibility of this agency to safeguard, is to report such knowledge to his/her direct supervisor as soon as possible.

NEW MEXICO CORRECTIONS DEPARTMENT
Agency Loss Control Plan
(Continued)

- c) Any employee who becomes knowledgeable of an incident resulting in an injury to someone other than an employee of this agency or the loss/ damage/destruction of his/her property is to report such knowledge to his/her direct supervisor as soon as possible.

4. Investigation of Losses:

- a) The person having direct supervisory responsibility will conduct an investigation of loss incidents, including those described above, as soon as possible after becoming aware of the incident.
- b) Investigation findings will be reported on agency form number CD-160802.5, *Supervisor's Incident Investigation Report of Loss*.
- c) If an employee on-the-job injury, state vehicle accident, theft, damage or destruction of state property is involved, the supervisor will ensure that the Administrative Services Division is notified so that the necessary notification can be made to appropriate insurance carriers.
- d) Investigation reports will be forwarded through supervisory channels to the appropriate Division Director. The Division Director will review and approve corrective action taken or planned or will direct other or additional corrective action. A copy of the report will then be forwarded to the Loss Control Coordinator and the Division Director will report on the loss at the next Loss Control Committee meeting.

5. Self-Inspection Program:

An inspection of division work areas and activities will be conducted annually; using the checklists attached (Forms 160802.1 thru 160802.4). The Division Director is responsible for determining when the inspection will be conducted and by whom. Division directors may add inspection items to these checklists, but are not to delete items unless they may not apply to the Division. Completed checklists will be forwarded to the Loss Control Coordinator. In addition to this self-inspection, Division Directors are encouraged to develop a self-inspection program that will more adequately cover the activities of their particular Division.

6. Loss Control Training:

Formal and on-the-job training required for employees to perform or improve the performance of their duties is considered a form of loss control training. However, it is anticipated that additional loss control training needs will be developed during self-inspections, and investigation of losses. Examples are: office safety, office security, fire prevention, lifting safety, etc. Determining the need and authorizing/directing its completion will be the responsibility of the Loss Control Committee. In addition, requests or recommendations for such training may be forwarded by any Division Director to the Loss Control Committee for consideration.

NEW MEXICO CORRECTIONS DEPARTMENT
Agency Loss Control Plan
(Continued)

7. *Support and Participation:*

I expect all agency employees to support this Plan by performing their duties as efficiently and safely as possible and reporting loss exposures and/or loss control suggestions to their supervisor or division chief.

E. Are desk drawers provided with safety stops?	—	—
F. Are positive-latching mechanisms provided for paper cutters and paper cutter blades secured in locked position after use?	—	—
G. Are metal trash cans used instead of plastic ones to preclude the release of toxic substances in case of a trash can fire?	—	—
H. Are office fans provided with nylon or other mesh guards of openings sufficient to prohibit the introduction of fingers into the case interior (1/4")?	—	—
IX. <u>Filing Cabinets</u>		
A. Are filing cabinet drawers closed immediately after use?	—	—
B. Are filing cabinet drawers provided with safety stops?	—	—
C. Are stools or chairs adequately stored out of passageways when not in use?	—	—
X. <u>Other Office Hazards</u>		
A. Are low-flammability and low-toxicity solvents used in printing and duplicating operations?	—	—
B. Are metal waste safety containers provided for soiled rags impregnated with duplicating solvent?	—	—
C. Are solvents handled with caution so that employees will not accidentally splash these materials onto parts of their bodies or into their eyes?	—	—
D. Are spindles (spiked files) prohibited in offices? <i>(Many office hand injuries occur from these spindles.)</i>	—	—
E. Is office machinery operated and maintained only by authorized persons?	—	—
F. Is broken or defective office equipment reported by the employees to their supervisors, who in turn, notify the proper agency to have it repaired/replaced?	—	—
G. Are maintenance personnel contacted for the movement of heavy pieces of office equipment?	—	—

Checklist for Institutions Self-Inspection

INSTITUTIONS

Facility: _____ Location: _____ Date: _____

INSTRUCTIONS:

*Enter Y (Yes), N (No), or N/A (Not Applicable) in the column to the right of the condition or area being inspected.
N/A is appropriate only when such conditions/areas do not exist in a given facility.*

I. Housekeeping

- A. Written housekeeping procedures are available. _____
- B. Garbage and waste are properly stored and disposed of. _____
- C. Lobby areas are clean, well lighted and free of hazards. _____
- D. Corridors, walkways clean, well lighted, free of hazards. _____
- E. Stairs are clean, well lighted, and free of hazards. _____
- F. Walls are clean and in good repair. _____
- G. Ceilings are clean and in good repair. _____
- H. Floors are clean and in good repair. _____
- I. Premises are neat, clean, and free of rubbish. _____
- J. Other openings are provided with adequate protection from bug/rodent infestation. _____
- K. Exterior walls, paint, windows and railings are in good condition. _____
- L. Landscaping is free from weeds and trash. _____

Specify Deficiencies: _____

II. Living Unit

- A. Bedding (Mattress, Blanket, etc.) is clean and in good repair. _____
- B. Available bedding meets or exceeds needs for each inmate. _____
- C. Individual room/cell is clean and free from litter and dust. _____
- D. Closet/wardrobe/assigned clothes hanging area is available for each resident. _____

Specify Deficiencies: _____

NEW MEXICO CORRECTIONS DEPARTMENT

Checklist for Institutions Self-Inspection
(Continued)

III. Laundry

- A. Adequate hand washing facilities are available. —
- B. Adequate storage space exists for supplies. —
- C. Water temperature for washing machines exceeds 165 degrees Fahrenheit for 25 minutes. —

Specify Deficiencies: _____

IV. Restroom/Shower Facilities

- A. Restroom walls, grouting, ceiling, floors and mirror are clean and in good repair. —
- B. Commode is clean, properly sanitized, and in good repair. —
- C. Suitable hand cleansers and paper towels, or approved dryers are available. —
- D. Restrooms are well-ventilated and free from odor. —
- E. Showers and bathtubs are clean and sanitized. —
- F. Shower curtains are clean and in good repair. —
- G. Water temperature does not exceed 120 degrees Fahrenheit and is thermostatically controlled. —

Specify Deficiencies: _____

V. Hair Care Facilities

- A. Adequate tool storage is available. —
- B. Adequate facilities for sterilization of tools are available. —
- C. Adequate supply of clean towels is provided. —
- D. Neck strips/sanitary towels are available. —
- E. Head rest tissues are available. —
- F. Current barbering regulations are posted and followed. —

Specify Deficiencies: _____

Facility: _____ Location: _____ Date: _____

INSTRUCTIONS:

Enter Y (Yes), N (No), or N/A (Not Applicable) in the column to the right of the condition or area being inspected. N/A is appropriate only when such conditions/areas do not exist in a given facility.

I. Food

- A. Are there any spoiled foods? _____
- B. Foodstuffs are in original containers and properly labeled. _____

Specify Deficiencies: _____

II. Food Protection

- A. Perishable food is properly heated or refrigerated during storage, thawing, preparation display and transportation. _____
- B. Refrigerator and freezer thermometers are conspicuously displayed and accurate. _____
- C. Refrigerator/freezer temperatures are appropriate to the foodstuffs being stored within (*review temperature logs*). _____
- D. Food is appropriately covered/protected during storage, preparation, display, serving and transportation. _____
- E. Handling of food (including ice) is minimized and all food-handlers wear hats, hair nets and sanitary gloves. _____
- F. Dispensing utensils are properly stored while in use and between meals. _____

Specify Deficiencies: _____

III. Personnel

- A. Personnel with infections are restricted from the food service area. _____
- B. Food handlers have received pre-assignment and annual exams. _____
- C. Food handlers (and their clothing) are clean and neat. _____

Specify Deficiencies: _____

NEW MEXICO CORRECTIONS DEPARTMENT

Checklist for Institutions Self-Inspection
(Continued)

IV. Food Equipment and Utensils

- A. Food contact surfaces and utensils are clean and free of rust, corrosion, cuts, cracks, detergents and rough surfaces, and are properly stored. —
- B. Dishwashing facilities maintain appropriate temperatures and are functioning properly. Accurate thermometers and chemical test kits are provided. —
- C. Towels and wiping cloths are clean, properly stored and used. —
- D. Non-food contact surfaces and utensils are clean and utensils are properly stored. —

Specify Deficiencies: _____

V. Sewage, Garbage and Trash

- A. Sewage, garbage and trash are disposed of/removed as scheduled or required. —
- B. Garbage/trash containers are covered except during meal preparation and clean-up. —
- C. Garbage/trash containers are clean and insect/rodent proof. —

Specify Deficiencies: _____

VI. Plumbing

- A. Plumbing is leak-free, operable, and prevents backflow. —

Specify Deficiencies: _____

VII. Toilet and Hand Washing Facilities

- A. Facilities are convenient, accessible, functional and clean. —
- B. Toilet rooms are clean, enclosed and have self-closing doors. —
- C. Fixtures and equipment function properly, are clean and sanitary towels/tissues/hand dryers are provided. —

Specify Deficiencies: _____

NEW MEXICO CORRECTIONS DEPARTMENT

Checklist for Institutions Self-Inspection

VIII. Inspection and Rodent Control

- A. Area is insect/rodent-free. —
- B. Outer openings are protected; animals are prohibited. —
- C. Contracted services are performed as scheduled/needed. —

Specify Deficiencies: _____

IX. Floors, walls, ceilings, tables, dispensers, and attached equipment are clean and in good repair.

Specify Deficiencies: _____

X. Lighting, ventilation, noise levels and temperatures are appropriate to the setting.

Specify Deficiencies: _____

XI. Other

- A. Toxins, caustics and flammables are properly labeled and stored. —
- B. Premises are free of litter and cleaning equipment is properly stored, maintained and sanitized. —

Specify Deficiencies: _____

	<u>YES</u>	<u>NO</u>
G. Are air tools equipped with tool retainers to prevent the inadvertent ejection of a tool during an operation?	—	—
H. Are compressed-air hoses and connections approved for the operating pressure and service being performed?	—	—
I. Are air hoses free from signs of wear, abrasion, oil damage, etc.?	—	—
J. Is compressed air that is used for cleaning purposes limited to 30 pounds per square inch?	—	—
K. Are proper precautions taken when cleaning with compressed air? (Safety goggles shall always be worn. The air nozzles shall never be directed toward the body.)	—	—
III. <u>Abrasive Wheels</u>		
A. Are there wheel enclosures to restrain all pieces of the grinding wheel in the event the wheel explodes during an operation?	—	—
B. Are abrasive wheels used only on machines provided with safety guards, e.g. shatterproof glass shields, tool rests, etc.?	—	—
C. Are grinding wheels inspected for defects before use?	—	—
D. Is grinding on the side of the grind wheel prohibited?	—	—
IV. <u>Explosive-Actuated Fastening Tools</u>		
A. Do all operators and assistants wear approved face and eye protection?	—	—
B. Does the muzzle end of the tool have a protective shield or guard?	—	—
C. Is the guard designed to prevent flying particles from hitting the operator?	—	—
D. Does the firing mechanism require at least two separate and distant operations to fire? (<i>Prevents an accidental discharge if inadvertently dropped or while being handled?</i>)	—	—
E. Are all loads coded to identify power-load levels by color, number, configuration, or other appropriate method? (<i>Only trained personnel knowledgeable of these markings shall operate these fastener devices.</i>)	—	—

NEW MEXICO CORRECTIONS DEPARTMENT

Checklist for Institutions (Tools) Self-Inspection
(Continued)

	<u>YES</u>	<u>NO</u>
F. Are the fasteners used in tools limited to those specified by the manufacturer	—	—
G. Is storage of firing caps in accordance with OSHA standards?	—	—
H. Is the tool designed so that all breaching parts will be reasonably visible to allow a check for foreign matter which may be present? (<i>Operators may check from the breach end but NEVER FROM THE MUZZLE END.</i>)	—	—
I. Are operators trained in the use of the tool?	—	—
V. <u>Lifting Devices (Jacks)</u>		
A. Are operators using properly-rated jacks to lift and sustain loads?	—	—
B. Is the rated load capacity stamped, marked, etc., on the jack?	—	—
C. Is the load blocked and secured in both the initial and the lifted position in order to prevent a serious accident?	—	—
D. Are jacks inspected at regular intervals for mechanical/hydraulic defects by supervisors? (<i>Employees shall be encouraged to report and turn in any defective jacks.</i>)	—	—

	ISSUE DATE: 02/18/85 REVIEWED: 08/31/17 EFFECTIVE DATE: 02/14/85 REVISED: 03/09/15		
	TITLE: Corrections Industries Loss Control Program		

AUTHORITY:

Policy *CD-160800*

PROCEDURES:

A. Staff Safety Training:

1. Each facility shall establish health and safety rules that are to be distributed to all staff, volunteers, contractors, and inmates assigned to industries. These rules should include the appropriate use of mandatory safety equipment and clothing. **[2-CI-1A-1]**
2. All staff, volunteers, contractors, and inmates shall receive an orientation to safety and operating instructions for equipment prior to using the equipment. **[2-CI-1A-2]**
3. The Facility Manager at each Institution shall coordinate an ongoing formal safety training program for staff, volunteers, contractors, and inmates in industries. Training will be conducted semi-annually and documented. **[2-CI-1A-3]**
4. Corrections Industries shall adhere to applicable federal, state, local fire, sanitation, safety, and health standards. **[2-CI-1A-4]**
5. A designated representative from each Corrections Industries shall attend the facility quarterly safety meeting and shall address all safety issues and represent input and concerns from inmate workers. Following the quarterly meeting the designated staff member shall meet with industry inmates and give follow-up instruction in general safety, fire prevention, fire evacuation, issuance of chemicals, and address all safety issues. The designated representative shall also document these meetings and forward a copy to the Deputy Director and Fire Safety and Sanitation Officer (FSSO). **[2-CI-1A-5]**

B. Inmate Safety Training:

1. Safety training is included in each inmate's initial indoctrination to Corrections Industries.
2. All potentially hazardous machines such as, circular saws, hand saws, panel saws, radial arm saws, planers, shapers, jointers, presses, paper cutters, fabric cutters, etc. shall be fitted with blade guards, fences, two-tripping switches or other appropriate safety devices to protect the operator and other employees in the area from injury. Machines will not be operated without these safety devices in place and operational guards for protection when grinding or cutting or otherwise processing materials.

3. Before any inmate operates a machine in any shop, he or she is to be instructed in the details of safe operation of that machine by the shop supervisor. The instruction will also include information on the use of safety devices, personal protective equipment and equipment as appropriate.
4. Use, service and maintenance of personal protective equipment must be cleaned and stored as required by the OSHA standards on a daily basis after each use as suggested by the manufacturer.
 - a. Eye Protection: In areas with designated potential eye hazards, the use of eye or eye and face protection shall be enforced. Anyone passing through, visiting or working in that area shall wear eye or eye and face protection at all times.
 - b. Head Protection: In areas where it has been determined that a potential hazard for head injury exists, the wearing of hard hats shall be mandatory.
 - c. Respiratory Protection: In areas where it has been determined that a potential respiratory hazard exists; personnel will be required to wear protective face masks of a type approved for the atmosphere in which they are used.
 - d. Hearing Protection: In areas where it has been determined that a potential hearing hazard exists; personnel shall be required to wear protective ear plugs or ear muffs.
 - e. Protective clothing: Other protective clothing such as aprons, coveralls, jackets, mitts or gloves will be made available to individuals working in potential hazardous areas requiring such protection.
7. Additional safety instructions may be promulgated by shop supervisors with the approval of the Facility Manager so long as they are not in conflict with this procedure or those of their respective institutions.

David Jablonski, Secretary of Corrections
New Mexico Corrections Department

08/31/17
Date

**NEW MEXICO CORRECTIONS DEPARTMENT
CORRECTIONS INDUSTRIES**

General Safety Rules for All Industrial Areas

1. Secure approval from your supervisor for all work you plan to do.
2. Remain in your assigned area, no visiting from one shop to another.
3. Absolutely **NO HORSE PLAY** or running around in the workshop.
4. Develop a receptive attitude towards safety and be alert in making others aware of safety hazards and improper procedures.
5. Learn procedures to follow in case of fire or accident.
6. Report all injuries to your supervisor, regardless of how slight they may be.
7. Do not operate any piece of equipment without being checked out by your supervisor and briefed on safety procedures for the equipment.
8. Use proper protective eye covering, clothing or equipment as directed.
9. Use the safety devices provided for your machine and do not start the machine without them in place and operational.
10. Wear appropriate clothing. Clothing should not be loose fitting. Roll up sleeves; remove rings, watches, necklaces and other jewelry.
11. Keep hair away from moving equipment parts. Extremely long hair is a safety hazard.
12. Report to your supervisor any machines or tools that do not function properly or show need of maintenance.
13. Keep cabinet drawers and doors closed.
14. Keep your work station and equipment clean; wipe up spills immediately to prevent falls.
15. Do not allow chips, scraps or other litter to accumulate on the floor.
16. Place oily rags and other combustible materials in fire proof metal containers.
17. Be careful in handling and storing materials; get help with long or heavy stock.
18. Insure that Safety Zones are identified.
19. Use traffic lanes, staying clear of safety zones unless operating equipment.
20. No riders when operating forklift **NO EXCEPTIONS.**
